

Press Release

FenderTeam SPC-1400H Cone-Fender Systems for more than 3km (1.8miles) of quay wall at King Abdullah Port – KSA

In June 2012, FenderTeam became part of the most ambitious port project in KSA, King Abdullah Port near Jeddah. FT was awarded the contract for the manufacturing, testing and supply of 103nos. SPC-1400H Cone-Fender Systems with 2200 x 5700mm closed box steel fender panels and 57nos. Stag Horn Bollards for the first phase of this major transshipment hub to be, in the Middle East.

Our client was extremely satisfied with FenderTeam's performance from the first design, the state-of-the-art and quality driven manufacturing up to the installation supervision on site and after the successful completion of the first phase, awarded FT with the contract to supply another 50+ Fender Systems and bollards for the following phase.

Additionally, FT has been awarded with the supply of another 196nos. Fender Systems and 101nos. Bollards for the adjacent RoRo and Bulk Terminal, establishing one of the most impressive Fender References in the Middle East.
