ShibataFenderTeam Foam Filled Fenders -Made in Germany- for Gdansk, Poland

ShibataFenderTeam has just completed a foam fender project for the Port of Gdansk with a turn around time of 2 weeks from receipt of the order. This included the technical approval, manufacturing of the fenders and hardware at our Germany based foam filled fender production plant as well as the delivery to the jobsite in Poland.

The client, Port of Gdansk, was extremely happy with the performance during the execution of the order as well as with the delivered fenders and is considering to have additional fenders on-call.

This project is a perfect example for the great success of our foam fenders in the European market. With manufacturing in Germany, we are able to provide high quality, "MADE IN GERMANY" fenders with delivery times of 2 weeks or even less. For emergencies, we would even be able to produce fenders within a couple of days.
